

Hamilton County Threat Assessment Management (TAM)

Threat Assessment Management (TAM) is a proactive, prevention-based approach to identifying, assessing, and managing concerning or threatening behaviors before an act of violence occurs, including domestic terrorism and targeted violence. Early identification and intervention are essential to reducing risk and preventing harm.

The Hamilton County Threat Assessment Management Team is a multidisciplinary partnership that works with law enforcement, mental health, schools, social services, and other community partners to assess threats and coordinate appropriate interventions for individuals, families, and potential victims when traditional law enforcement responses may be unavailable or inappropriate.

The Hamilton County Threat Assessment Management Team accepts reports of concerning or suspicious behaviors that may indicate a potential future act of targeted violence. Reports may be submitted through the online reporting form or by calling (phone ##) 24 hours a day. Every report is reviewed promptly by the Threat Assessment Management Team.

Hamilton County Threat Assessment Management Team
